## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Caveney (US patent 4,191,442).

In regard to claims 1-5, Caveney's device discloses a wiring interconnection device comprising an insulation displacement connector (IDC); and a slot at 110 formed in the device and leading to said IDC, wherein said slot includes at least one retaining edge at 108 to hold a wire (28-2) in an electrical connection to said IDC; wherein said slot includes first and second, the third and fourth retaining edges to hold a wire in an electrical connection to said IDC (see figs. 6-15); wherein said first retaining edge is provided on a first wall forming said slot and said second retaining edge is provided on a second wall forming said slot (see figs. 6-15; wherein the first and second walls, forming said slot, are angled and come closer together at 114C as they approach said IDC (see figs. 6-15) in order to make connection with the wire; wherein said retaining edges are sharp in order to cut through the wire insulating portion and make electrical contact.

In regard to claims 6-7, Caveney's device discloses the aforementioned limitations including the distance between the retaining edges at the walls being less or equal to the diameter of the wire (see fig. 12).

In regard to claims 8-14, Caveney's device discloses the aforementioned limitations including the retaining edges at 108c on both walls before encountering the IDC (see fig. 12).

In regard to claims 15-21, Caveney's device discloses the aforementioned limitations including the retaining edges at 114c on both walls after encountering the IDC (see fig. 12).
